

# FREE POND INSPECTION AND MAINTENANCE SEMINAR

At this seminar, we have invited representatives from **Wisconsin DNR** to discuss such issues as:

- Why are stormwater ponds important to the health of the Root River and other water resources?
- How does a stormwater pond function and what are the features that need to be inspected and maintained?
- When is the best time to inspect a pond?
- How to inspect for animal damage?
- When is vegetation growth a problem?
- What is an algae bloom and how to prevent or treat?
- When is it proper to chemically treat a pond?
- What are the alternatives to chemical treatment?
- GEESE! What to do about them.
- Your Questions.

Guest speakers from **Wisconsin Department of Natural Resources:**

**Pete Wood** – Stormwater Engineer

**Craig Helker** – Water Resources Biologist

WEDNESDAY 6-8 pm

**APRIL 15, 2015**
