## BETTER FIBER INTERNET. MADE IN WISCONSIN.

### The first real fiber in Franklin.

Until now, Franklin has had cable and DSL. That changes today. You may have already seen our crews in the neighborhood. Edge Broadband has been building 100% fiber across Southern Wisconsin for over a decade and now it's Franklin's turn. Built, installed, and supported by your local Wisconsin team.

### One price. All-in. Forever.

Every plan includes managed Wi-Fi at no extra cost. No router rental. No "Wi-Fi+ fee." No promo expirations. The price you sign up at is the price you pay: locked for life.

**Reserve your spot!**  
[order.edgebroadband.com](http://order.edgebroadband.com) or call **262.458.4220.**

**EDGE STARTER**

**1** GIG **\$69** /MO ALL-IN

More than enough for a whole household.

**EDGE PLUS**

**2** GIG **\$79** /MO ALL-IN

Best value, hands down.

**EDGE PRO**

**5** GIG **\$109** /MO ALL-IN

For big households and small businesses.

**EDGE MAX**

**8** GIG **\$169** /MO ALL-IN

The fastest residential plan in Wisconsin.

**25** GIG **LAKE APEX** available by request  
The fastest internet in Wisconsin. Period.

**Sign up early. Lock in your price for life.** Free installation and managed Wi-Fi included.

Locally built. Locally supported. We'd love to have you in the Edge Broadband family.

We are excited to bring world class fiber internet to Franklin. We understand you might have some questions about our process. Here is what you can expect:

### 1. Utility Locating

Before construction begins, underground utilities will be marked throughout the neighborhood. This step ensures the safety of our crews as well as residents.

You may notice:

- Colored utility flags
- Temporary paint markings

### 2. Fiber Network Construction

Our crews use a method of construction known as horizontal directional drilling or “boring”. This allows us to install conduit with minimal disruption.

This process allows us to:

- ✓ Avoid large open trenches
- ✓ Minimize impacts to the landscape
- ✓ Safely build a reliable fiber network

You may notice:

- Small drill entry/exit points
- Directional drilling equipment
- Fiber crews working in easements and roadways

### 3. Property Restoration

Any disturbed areas will be restored after construction is completed.

Typical restoration includes

- Backfilling disturbed areas
- Adding topsoil
- Applying grass seed and straw as needed

**Please note:** Some restoration work may occur after construction crews have completed work in your area depending on weather and seasonal conditions.

### 4. Service Ready / Installation

If you have pre-signed for service:

- Our team will contact you to schedule installation
- Installations are professionally completed by Edge Broadband technicians
- Most installations are completed in under 2 hours

Please visit [edgebroadband.com/construction](https://edgebroadband.com/construction) for more information

### Still have questions?

We are local and we are happy to help! Please call us at **262-458-4220** or send us an email to [support@edgebroadband.com](mailto:support@edgebroadband.com)
