

# IT'S A GREEN SUMMER IN FRANKLIN

with FREE Workshops, Rain Barrels,  
Rain Gardens, and Native Plants

MMSD's Fresh Coast Team is working in Franklin this summer to help you become part of the stormwater solution. We're going to install rain barrels and plant rain gardens for Franklin residents for **FREE** all summer long. **Supplies are limited**; please contact us online, by phone, or by email to reserve your spot on our Green Summer list! Our contact information is on the back of this flyer.

# FREE GREEN INFRASTRUCTURE WORKSHOPS

We will host **FREE** green infrastructure workshops about rain barrels and rain gardens, where you will learn more about how to manage stormwater on your property. Workshop participants will be eligible to win a **FREE** rain barrel, rain garden, or native plants. Let us help you improve our waterways.

# FREE WATER BY THE BARREL

Using a rain barrel is a great way to help manage water where it falls. Rain barrels provide **FREE** water for your gardens and plants love natural rainwater. Our rain barrels can capture 50 gallons of rainwater each time it rains. They are easy to install and maintain.
