**INSPECTOR'S FIELD REVIEW for \_\_\_\_\_**

by: \_\_\_\_\_

- DESIGN REPETITION: A building design may not be repeated within four lots of an existing building. This shall apply to all buildings, whether or not they are constructed by the same builder.

\_\_\_\_\_  
\_\_\_\_\_

- FOUNDATIONS BELOW OVERHANGING BAYS: Buildings shall be designed with foundations below all bays which overhang the building foundation.

\_\_\_\_\_  
\_\_\_\_\_

- CORNER SIDE ELEVATIONS: Buildings located on corner lots shall continue the major front elevation design elements around the corner elevation.

\_\_\_\_\_  
\_\_\_\_\_

- BLANK SIDE ELEVATIONS: Building side elevations which have only siding used on these elevations as element/s shall provide some additional architectural design element/s to break up the plane of the wall. This may be done by the addition of window/s, gable end wall treatments, siding design and accent panels or other architectural design treatments consistent with the principal building design.

\_\_\_\_\_  
\_\_\_\_\_

- SCALE OF BUILDING ELEVATIONS: Building plan elevations shall be submitted to a scale not less than 1/4 inch equals one foot (1/4" = 1').

\_\_\_\_\_  
\_\_\_\_\_

- ELEVATION DETAIL: Building plans shall be submitted with all detail drawn in on each elevation. Plans drawn with partial building details drawn in will be returned to the builder/owner for redrafting. Red-line drawing will only be accepted for minor detail changes, major changes will require redrafting of the building elevations.

\_\_\_\_\_  
\_\_\_\_\_

- ENCLOSURE OF METAL FURNACE VENTS: All chimney and fireplace vents shall be enclosed in a chase constructed of materials similar to those materials used on the building elevations. The Board will also accept metal housings designed by the vent manufacturer to enclose the chimney vents.
