RUEKERT/MIELKE W233 N2080 Ridgeview Parkway Waukesha, Wisconsin 53188-1020

#### **INTRODUCTION**

In 2002, the City of Franklin hired Ruekert & Mielke, Inc. to prepare a public facilities needs assessment and impact fee study (2002 Impact Fee Study) for the construction of law enforcement and municipal court facilities and fire protection and emergency medical facilities, as well as library, park and recreation, transportation system and water system facilities. The needs assessment was prepared during February and March of 2002 in accordance with Wisconsin Statutes 66.0617, formerly Wisconsin Statutes 66.55, and was presented to the City on April 16, 2002. The City held a public hearing on the proposed impact fee ordinance on May 7, 2002. On May 7, 2002 the City adopted the impact fee ordinance imposing total impact fees in the amount of \$3,809. Since then a 2004 amendment updated the law enforcement/municipal court, and fire protection and EMS impact fees. Within the 2004 update most of the analyses remained unchanged with the exception of the development projections, land use projections, and a few of the estimated project costs for the police and fire facilities. After the 2004 update, no other amendments or changes have been implemented to alter the Franklin impact fees until now, through the 2013 park impact fee update.

The purpose of this amendment is to update the original needs assessment to revise the land use, population and development projections and update the park impact fee project lists, costs, and identify any new park projects or improvements that may be required due to new development. These amendments are intended to allow the City to recover the costs related to serving new development within a reasonable amount of time and to reallocate costs based on the revised projections of development in each class. This amendment is supplementary to and intended to be read in conjunction with the 2002 Impact Fee Study, and 2004 amendment. This amendment is to act as an updated public facilities needs assessment took place can be seen below.

The July 12, 2013 memorandum (attached hereto) includes all updated park and recreation facilities updates and changes for the public facilities needs assessment. The memorandum text describes all changes and updates that were completed to the park and recreation, which each of the updated tables incorporated and completed for viewing.

#### **METHODOLOGY**

The public facilities needs assessment prepared in 2002 included the following, as required by Wisconsin Statutes 66.0617:

1. An inventory of existing public facilities including an identification of existing deficiencies in the quantity or quality of those public facilities, for which it was anticipated that an impact fee would be imposed.

Amendment to Park Impact Fees September 4, 2013 Page 2

- 2. An identification of new public facilities or improvements or expansions of existing public facilities that will be required because of new land development. The identification was based upon an explicitly identified level of service and standards.
- 3. A detailed estimate of the capital costs of providing the new public facilities or improvements or expansion previously mentioned.
- 4. A computation of the cost per capita of providing the new public facilities required because of new land development, and a recommended schedule of impact fees, including an estimate of the effect of imposing impact fees on the availability of affordable housing within the City. (Note: due to the projected park and recreation facilities impact fee being less than the current fee, the impact on housing affordability is a net positive impact. By proposing to decrease the fee there should be no negative effect on the housing affordability for the new park and recreation facilities impact fee.)

July 12, 2013

Mr. Mark Luberda Director of Administration City of Franklin 9229 W. Loomis Road Franklin, WI 53132

RE: Park Impact Fee Update

Dear Mr. Luberda:

Ruekert/Mielke (R/M) has completed the 2013 park impact fee update. All items listed in the May 10, 2013 memorandum and discussed during the June 17, 2013 conference call with City Staff have been addressed. All revisions and changes requested by the City have been incorporated into the attached tables for your review and described below.

As discussed during the conference call, the occupancy factor was changed from 2.72, as supplied by MMSD (Milwaukee Metro Sewer District) to 2.90. This change was requested by the City for a better representation of the average occupancy factor over the past several years. Secondly, the City and R/M came to an agreement that all future yearly fee escalations shall be based upon the Milwaukee CPI (Consumer Price Index). In addition to the yearly fee escalations, all impact fees should be reviewed on a regular basis (every 3-5 years) to ensure the most proper and justifiable impact fee is still in place.

Several smaller changes to individual costs attributed to park improvements were modified or updated based on the revised information supplied from the City's finance department. These changes in cost are reflected in the updated cost tables attached hereto, specifically Tables 22 through 29. One large cost that was added is the North Cape Road bike trail improvements. These improvements were not included in the CORP plan, but rather supplemented through City Council direction at the June 4, 2013 meeting to include these improvements within the impact fee calculations. These improvements include 10,820 lineal feet of addition trail way at a cost of approximately \$760,000.

In addition, a footnote was added to table 20 to explain the significant change in the community park type design standard versus the NRPA design standard. The inclusion of Southwest Park, a regional/multi-community park facility, within the community park type, significantly increases the City design standard. However, when comparing it to the NRPA design standards, it does not have a category for regional/multi-community park facilities; therefore the comparison is not relevant to the circumstances of the City.

Mr. Mark Luberda Re: Park Impact Fee Update July 12, 2013 Page 2

The only change that is not reflected in the attached updated tables is within Table 2, which is the total amount of impact fee dollars to be spent in accordance with state law time frame requirements. The City of Franklin finance department asked whether or not the interest accumulated over time was required to be spent in accordance with the timing requirements of the statutes or whether this money was exempt from time frame restrictions. R/M reviewed the statutes and deferred the answer to the City Attorney for interpretation of the statutes. Therefore, at this time, R/M still illustrates Table 2 to include the interest accrued within the total amount to be spent within the required time frame. If the City attorney finds that this is not the most accurate interpretation of the law, R/M can provide an updated table at that time.

Therefore, with all the changes described above, the new park impact fee eligible costs would be \$10,750,220.00. Thus the City must collect funds to support the updated eligible costs for future projects prior to year end 2025. Based on the updated eligible costs and development projections for the next 12 years, the proposed current park impact fee would be \$2,816.00 per single family home, assuming 2.9 people per unit, and \$1,942.00 per multi-family dwelling assuming 2.0 people per unit. This new park impact fee would allow the City to continue collecting sufficient funds to complete park improvements for years to come.

Attached hereto are revised and updated park impact fee tables with supporting financial tables and impact fee calculation tables. Tables 1 and 2, help show the previous and current year financial status of park impact fee collections for the City. Table 1 is a financial summary of the park impact fee collections over the past 10 years. This table shows the amount collected, amount spent, interest allocation to date, and total park impact fee amount with interest included. Table 2 breaks down the amount spent to date and the remaining to spend with the associated year it must be spent according to state law as described above.

Tables 5 and 15a through 29 are tables or modifications of tables contained within the original 2002 impact fee study. These tables follow the same general numbering scheme as the 2002 impact fee study to provide clarity and ease for comparison purposes. These tables have since been updated with new information and data as provided by the City of Franklin administration. Table 5 shows updated population numbers and projections for the City of Franklin. These population numbers, as provided by the City of Franklin, are extremely important in the calculation of impact fees as future development is one of the driving factors in the impact fee calculation. Table 15 has been edited to include Table 15a and 15b. These two tables combined show the existing park facilities and connecting trail facilities. Tables 16 through 18 show an inventory of park facilities and list the currently developed parks throughout the City.

Tables 19 through 21 include the initial data for the impact fee calculation. These tables compare existing and future facilities as well as developed and undeveloped parks and trails. This comparison along with NRPA standards allow for the creation of a design service level

Mr. Mark Luberda Re: Park Impact Fee Update July 12, 2013 Page 3

standard for all park types and trails present. Table 21 uses the newly created design standards and the updated development projections from Table 5 to complete the excess/deficiency analysis for all park and trail types categorized. Tables 22 through 24 show the recommended and completed improvements, as well as land acquisitions for all current city owned parklands and planned city parkland purchases and developments prior to 2025. These costs along with the deficiency analysis for each park type or trail type allow for a final allocation of facilities to be constructed for each facility type. This allocation represents the percentage of deficiency and/or excess for future development within each facility type. These percentages are then used in Table 26, the cost summary, where all proposed improvements scheduled to take place prior to 2025 are shown with their amount of eligible costs through impact fee collections. This impact eligible amount is dependent on allocation percentages in Table 25 and the improvements and land acquisitions listed in Tables 22 through 24.

With the total amount of eligible costs and future development projections updated, a new per capita impact fee was created and shown in Table 27. Table 28 shows an updated park and recreation facilities impact fee schedule for single family dwelling units, as well as multi-family dwelling units based on the proposed costs for improvements and land purchases. Lastly, Table 29 shows a preliminary capital improvement plan for the City to use as a sample model. This plan will allow for future planning of borrowing and spending of impact fee contributions.

Please feel free to contact our office if you have any questions, comments or concerns.

Very truly yours,

RUEKERT/MIELKE

voido Rice

## Table 19Park and Recreation Facilities Needs AssessmentSummary of Existing and Planned Park and Recreation Facilities

Park Type	Existing Developed Park Sites (Acres)	Existing Undeveloped Parks to be Developed (Acres)	Recommended Park Site Acquisitions (Acres)	Total Recommended 2025 Park Sites (Acres)
Community (including Special Parks, and Southwest Park, and offroad planned trails) <sup>(1)</sup>	149.5	14.0	342.8	506.3
Neighborhood (in Park Sites) <sup>(1)</sup>	46.6	23.8	50.6	121.0
Mini-Park (in Park Sites) <sup>(1)</sup>	12.0	9.0	15.4	36.4
Total	208.0	46.8	408.9	663.7

	Existing Trails (Lineal Feet)	Proposed Trails to be constructed by City of Franklin (Lineal Feet)	Recommended Trail Acquistion (Lineal Feet)	Total Recommended 2025 Trail Length (Lineal Feet)
Connecting Trail Total	50,504	43,547	N/A	94,051

1) Recommended 2025 acreage need is based on existing developed active park and recreation facilities, plus additional facilities recommended in the Comprehensive Outdoor Recreation Plan Update of 2025.

## Table 20Park and Recreation Facilities Needs AssessmentDesign Service Level Standards: 2025

Park Type	Recommended 2025 Acres <sup>(1)</sup>	Design Standard (Acres per 1,000 Residents) <sup>(2)</sup>	
Community (including Special Parks, and Southwest Park) <sup>(4)</sup>	506.3	12.5	2.2
Neighborhood (in Park Sites)	121.0	3.0	1.7
Mini-Park (in Park Sites)	36.4	0.9	1.0
Total	663.7	16.4	4.9

		Design Standard (Lineal	NRPA Standard (Lineal
	Recommended 2025	Feet per 1,000	Feet per 1,000
	(Lineal Feet)	Residents)	Residents)
Connecting Trail Total	94,051	2,319	N/A

1.) Recommended 2025 acreage need is based on existing developed active park and recreation facilities, plus additional facilities recommended in the Comprehensive Outdoor Recreation Plan.

2.) Service level provided by the recommended acres, assuming a 2025 population of 40,564.

3.) Guidelines for minimum park acres per thousand residents published by the National Recreation and Park Association.

4.) Inclusion of Southwest Park, a regional/multi-community park facility, within the Community Park Type, significantly increases the design standard above the suggested NRPA Standard (12.5 vs. 2.2). However, since the NRPA design standard tables do not have a category for the regional/multi-community park facilities, the comparison is not relevant to the circumstances of the City.

#### Table 21 Park and Recreation Facilities Needs Assessment Analysis of Existing Park and Recreation Facilities Deficiencies

Actual Cost Mini Park #1 (Dr. Lynette Fox Memorial Park)			51,218	
Actual Cost Mini Park #4 (Ken Windl Park)			242,391	
Fotal Cost of Actual Mini Parks Completed and Five Proposed Parks			1,839,659	

Note: 1.) These facilities are to be added to all planned mini-park sites.

Parkland and Facility Needs	Park Type	Total Acreage	Development Cost	Status
Southwest Park	Regional/Community	200.0		
Preparation of a boundary Survey			3,000	Added
Preparation of a detailed site development plan			3,700	Added
Six (6) basketball goals			34,500	Added
Two (2) baseball diamonds			103,000	Added
Lighting for two (2) baseball fields			75,000	Added
Two (2) softball diamonds			92,000	Added
Play Field			59,700	Added
Soccer Complex (about 8 acres for four fields)			200,000	Added
Lighting for Soccer Complex			75,000	Added
Skateboard Park			20,000	Added
1/4 Mile BMX Racetrack (with obstacles)			16,000	Added
Playground			41,500	Added
Eight (8) tennis courts			292,000	Added
Lighting for eight (8) tennis courts			100,000	Added
Ice-skating area			0	Added
One-story 2,400 SF pavilion with indoor restrooms			232,800	Added
Passive (picnicking, etc.) and other recreation area			25,000	Added
Installation of landscape plant materials			30,000	Added
Provision of park benches, picnic tables, grills			26,000	Added
Provision of a 200-space off-street parking lot			616,000	Added
Installation of all park signage			25,000	
Provision of a multi-use walking/snowmobile/educational trail			238,100	Added
Provision of outdoor fitness stations			10,000	Added
Sanity sewer lateral extension into the park (700 +/- linear feet)			29,400	
Public water supply extension into the park (700 +/- linear feet)			30,800	
Electric line extension into the park (700 +/- linear feet)			3,000	Added
Subtotal Capital Costs			2,381,500	
Legal, Engineering and Design (10%)			238,150	
Total Development Costs (Future Costs w/ inflation from 2002 to 2013)			3,929,475	

Parkland and Facility Needs	Park Type	Total Acreage	Development Cost	Status
Planned Trails, Bicycle Routes, and Linkages	Community	15.03		
Minimum 43,547 Lineal Feet of 10 foot wide paved trail			1,497,994	Added
Legal, Engineering and Design (10%)			149,799	
Total Development Costs (Future Costs w/ inflation from 2002 to 2013)			2,471,690	
Parkland and Facility Needs	Park Type	Total Acreage	Development Cost	Status
Mahr Woods Special Park	Special	30.0		
Preparation of a boundary survey of the property			3,000	Added
Development of a detailed site plan and landscape plan			3,700	Added
Installation of all park signage (including interpretive signage)			15,000	Added
Provision of paved 8-space off-street parking			28,000	Added
Provision of a walking/education trail			56,400	Added
Addition of park benches and picnic tables			4,000	Added
Provision of outdoor fitness stations			2,000	Added
Subtotal of Capital Costs			112,100	
Legal Engineering and Design (10%)			11,210	
Total Development Costs (Future Costs w/ inflation from 2002 to 2013)			184,965	

Total Cost In Year 2013 Dollars - All Improvements to Planned City Parks

13,052,967

### Table 25 Park and Recreation Facilities Needs Assessment

#### Allocation of Additional Neighborhood and Mini Park Acreage to Existing Deficiencies and Future Development

	Neighborhood Parks Mini Parks		Community Parks (inclu and Southwe		Connecting Trails			
	Planned Acquisition / Development (Acres)	Percent of Total	Planned Acquisition / Development (Acres)	Percent of Total	Planned Acquisition / Development (Acres)	Percent of Total	Planned Acquisition / Development (lineal feet of trails)	Percent of Total
Existing Deficiency	41.4	56	14.5	59	218.7	61	17880.3	41
Area Needed for Future Development	33.0	44	9.9	41	138.2	39	25666.7	59
Total Planned Acquisitions / Development	74.4	100	24.4	100	356.8	100	43547.0	100

### Table 26 Park and Recreation Facilities Needs Assessment Acquisition and Development Cost Summary: Existing and Planned City Parks

		Acquisition Cost						Total Cost
